DATABASE

Table :-

Users :-

Field Name	DataType	Desc
Member	JSON(Array)	JSON data to store member
username	string	
firstName	string	
lastName	string	
title	string	
phone	string	
email	string	
mission	string	
year	string	
programInfo	string	
web	string	web site link
orgId	string	
orgName	string	
userType	string	Defines the role of the user {0 => reviewer, 1 => organization, 2 => manager and 3 => admin}
status	string	enum values :- applied, applying, applied
linkedin	string	
note	string	
IsDeleted	Boolean	Mange the state of the soft delete user

Note :-
Added only Filed in User table **isDeleted**

Program:-

Field Name	DataType	Desc
userId	string	
orgId	string	
status	string	https://prnt.sc/r104pq
programType	string	https://prnt.sc/r1062p

Organization:-

Field Name	DataType	Desc
name	String	
Type	String	
address1	string	
address2	string	
City	string	
State	string	
Zipcode	string	
parentOrg	string	
CertificateFiles	JSON(array)	
Mou	JSON(array)	

Application:-

Field Name	DataType	Desc
files	JSON(Object)	File

content	JSON(Object)	Exapmle => {
		    "1" : "Schedule3"
		  }

status	JSON(Object)	{
		    "1" : true
		  },

programId	string	
userId	string	
orgId	string	
sectionIndex	string	
numOfSubsection	string	
sectionId	string	

Check:-

Filed Name	DataType	Desc
CheckFile	JSON(Object)	File Desc
ProgramId	String	
OrgId	String	
Amount	String	
CheckId	String	
Date	String	

type	String	1 :- first check 2:- final check

AgreementPlacement:-

Filed Name	DataType	Desc
agreementTemplate	JSON(Object)	File
placementTemplate	JSON(Object)	File
signedAgreement	JSON(Object)	File
filledPlacement	JSON(Object)	File
finalFilledPlacement	JSON(Object)	File
programId	String	
orgId	String	
awardAmount	String	
placementUploadDate	String	
status	String	0: Pending 1: Active

Comment:-

Filed Name	DataType	Desc
programId	string	
orgId	string	
note	string	
commentDate	string	
userId	string	
username	string	
type	string	

FinalReport:-

Filed Name	DataType	Desc
q1	JSON(Object)	first question answer
q2	JSON(Object)	second question answer
q3	JSON(Object)	third question answer
programId	string	
orgId	string	
isSubmitted	boolean	false => not submited, true => submited

ProgramReport:-

Filed Name	DataType	Desc

file	JSON(Object)	file
programId	string	
orgId	string	
uploadDate	date	
type	string
